## MARINE CIRCULAR 59/2021

29 May 2021

**TO : Ship Owners, Ship Managers, Ship Operators, Charterers, Ship Masters, Classification Societies and the Shipping Community**

**SUBJECT : Guidelines on Maritime Cyber Risk Management**

### PURPOSE:

This circular serves to provide ship owners/managers/operators with IMO specific guidance relating to maritime cyber risk management in view of the recommended compliance to IMO Resolution MSC.428(98) from 01 January 2021.

### REFERENCES:

- (a) IMO Resolution MSC.428(98) – Maritime Cyber Risk Management in Safety Management Systems, 16 June 2017
- (b) IMO MSC-FAL.1/Circ.3 – Guidelines on Maritime Cyber Risk Management, 05 July 2017

### APPLICATION

This circular is applicable to all Kiribati flagged vessels.

### CONTENTS

#### 1. Background

Recognizing that cyber technologies is essential to the operation and management of numerous systems critical to the safety and security of shipping and the protection of the marine environment, the IMO acknowledged the vulnerabilities of these technologies to cyber risks and cyber threats, and on 16 June 2017, adopted Resolution MSC.428(98) - Maritime Cyber Risk Management in Safety Management Systems, and subsequently issued MSC-FAL.1/Circ.3 Guidelines on Maritime Cyber Risk Management on 05 July, 2017.

Noting that the rapidly changing technologies and threats makes it difficult to address these cyber risks through only technical standards, the IMO has recommended that cyber risks are addressed in existing safety management systems required by the International Safety Management (ISM) Code.

#### 2. Recommendations

- 2.1. Ship owners and operators are encouraged to comply with Resolution MSC.428(98) no later than the first annual verification of the company's DOC after 01 January 2021.
- 2.2. MSC-FAL.1/Circ.3 provides guidance on how to conduct an assessment of the cyber risks for complying with the Resolution.

- 2.3. Additional guidance is available from publications by BIMCO, CLIA, ICS, INTERCARGO, INTERTANKO, OCIMF, IUMI, US NIST and from IACS Classification Societies. For e.g., BIMCO has published its “Cyber Security Workbook for On Board Ship Use, 2nd Edition 2021” which uses detailed, step by step checklist to provide a ship’s crew with day-to-day management of on board cyber security to protect vulnerable on board systems. It also gives guidance on how best to detect, respond and recover in the event of a cyber-attack.
- 2.4. Vessels intending to call at US ports should take into account the “Vessel Cyber Risk Management Work Instruction / CVC-WI-027”, as amended, issued by the U.S. Coast Guard.

Yours sincerely,

Deputy Registrar
