Ship Recycling Convention

Upon the discussion at international organizations (UNEP, ILO, IMO), "Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009" was adapted in on 15 May 2009.

The Convention will enter into force on 26 June 2025.

>> "Ship Recycling Convention", "Hong Kong Convention / HKC"

➢ Application to : Ships ≥ 500GT

(Ships engaging only in domestic voyage throughout her life are not applicable.)

- Definition : "New Ship" means a ship:
 - .1 for which the building contract is placed on or after the entry into force of this Convention; or
 - .2 in the absence of a building contract, the keel of which is laid, or which is at a similar stage of construction on or after the entry into force of this Convention; or
 - .3 the delivery of which is on or after 30 months after the entry into force of this Convention.
 - "Existing Ship" : Not a new ship
- Development of IHM Part I :
 - "New Ship" : at the delivery
 - "Existing Ship" : Not later than 5 years after the entry into force of HKC
- > IHM Part I shall be properly maintained and updated throughout the operational life of the ship
- Prior to recycling IHM shall complete to incorporate Part II for operationally general wastes and Part III for store, in addition to the properly maintained and updated Part I.

Inventory of Hazardous Materials (IHM)

Component of IHM

Items to be listed in IHM set forth in the TABLE A-D of APPENDIX to the convention	Part I Ship structure and equipment	Part II Wastes	Part III Stores
Table A Prohibited/Limited Hazardous Materials [Asbestos, PCBs, Ozone-depleting substances, Anti- fouling compounds and systems]	 Image: A set of the set of the	-	-
Table B Hazardous Materials [Cadmium, Hexavalent Chromium, Lead, Mercury etc.]	Existing Ship: as far as practicable	-	-
Table C Potentially Hazardous Items	—	\checkmark	\checkmark
Table D Regular Consumable Goods potentially containing Hazardous Materials	_	_	\checkmark
When IHM developedat Delivery Existing Ship: within 5 yearsbet recy		fore cling	

Hazardous Materials(HazMat) on Table A & B for IHM Part I

Table	Materials	Threshold value
Α	Asbestos	0.1%
	PCBs	50 mg/kg
	Ozone Depleting Substances	No threshold value
	Anti-fouling compounds and systems	2,500 mg total tin/kg
В	Cadmium and Cadmium Compounds	100 mg/kg
	Hexavalent Chromium and Hexavalent Chromium Compounds	1,000 mg/kg
	Lead and lead compounds	1,000 mg/kg
	Mercury and mercury compounds	1,000 mg/kg
	Polybrominated diphenyl ethers (PBDEs)	1,000 mg/kg
	Polychlorinated naphthalenes (more than 3 chlorine atoms)	50 mg/kg
	Radioactive substances	No threshold value
	Certain shortchain chlorinated paraffins (Alkanes, C10-C13, chloro)	1%

Items on Table C & D for IHM Part II & III

Table	F	Properties	Examples	Part II [Wastes]	Part III [Stores]
С	C Liquid Oiliness Fuel, Lu Waste o		Fuel, Lubricant oil	1	\checkmark
			Waste oil, bilge	\checkmark	
	Liquid		Fuel additive, Antifreeze fluids	I	\checkmark
			Ballast water, sewage	\checkmark	Ι
	Gas	Explosives/ inflammables	Acetylene, Propane	Ι	✓
		GHG	CO2	-	\checkmark
			Medicines, Spare parts	-	\checkmark
	50110		Residues	\checkmark	_
D	Domestic and accommodation appliances ("NOT include ship specific equipment integral to ship operations")		Computers, refrigerators, printers, scanners, television sets, radio sets, video cameras, video recorders, telephones, consumer batteries, fluorescent lamps, filament bulbs, lamps	I	✓

Form of IHM - Parts II & III

(Standard Format of the Guideline for the Convention)

Part II OPERATIONALLY GENERATED WASTE

No.	Location ¹⁾	Name of Item (classification in appendix 1) and detail (if any) of the item	Appr quant	ox. tity	Remarks
1	Garbage locker	Garbage (food waste)	35.00	kg	
2	Bilge tank	Bilge water	15.00	m ³	
3	No.1 cargo hold	Dry cargo residues (iron ore)	110.00	kg	
4	No.2 cargo hold	Waste oil (sludge) (crude)	120.00	kg	Part II
5	No 1 ballast tank	Ballast water	2500.00	m ³	
5	5 No.1 ballast tank	Sediments	250.00	kg	

Part III STORES

No.	Location ¹⁾	Name of Item (classification in appendix 1)	Unit quantity	Figure	Approx. quantity	Remarks ²⁾
1	No.1 fuel oil tank	Fuel oil (heavy fuel oil)	1940	-	100.00 m ³	
2	CO ₂ room	CO ₂	100.00 kg	50 bottles	5000.00 kg	
3	Workshop	Propane	20.00 kg	10 pcs	200.00 kg	
4	Medicine locker	Miscellaneous medicines	-	-	-	Deta Part III
5	Paint stores	Paint, xx Co., #600	20.00 kg	5 pcs	100.00 kg	Cadu

New Ship

Shipyards develop IHM at the design and construction stage. Hazardous materials should be checked based on the Material Declaration (MD) furnished by the suppliers in the shipbuilding supply chain. (MEPC.269(68) 4.1)

Existing Ship

Alternative methods for ships in operation

IHM Experts prepare IHM by assessment of documents and onboard inspection (MEPC.269(68) 4.2)

- Additional Hazardous Materials on EU-SRR (PFOS HBCDD)
 - > ANNEX I (Control of Hazardous Materials) : Perfluorooctane sulfonic acid (PFOS)
 - > ANNEX II (List of Items for the IHM): Brominated Flame Retardant (HBCDD)

The table summarizing the minimum*** initial control of (PFOS·HBCDD):

	EU-SRR				
НМ	EU	Non El Johing			
	New ships*	Existing ships*			
PFOS	v	✓	-		
HBCDD	v	-	_**		

* After the initial preparation of the IHM, it shall be properly maintained and updated reflecting new installations containing HM referred to in Annex II of the SRR (meaning that thereafter all the HM included in Annex I and Annex II of the SRR should be included in the IHM).

** After the initial preparation of the IHM, it shall be properly maintained and updated reflecting new installations containing HM referred to in Annex II of the SRR taking into account the exemptions and transitional arrangements applicable to those materials under international law.

*** For existing and non-EU ships HM included only in Annex II of the SRR should be identified in the IHM as far as practicable. (Source: EMSA's Best Practice Guidance on the Inventory of Hazardous Materials Date: 28-10-2016)

IHM development for New Ships

- Shipyards need to prepare the IHM Part I for New Ships by the time of her delivery.
- It is difficult for shipyards to investigate hazardous materials on their own.

The convention set the framework for data collection process through <u>Maritime Supply Chain.</u>

Development of IHM

- Shipbuilder's steps to develop the IHM
- <Step1> Request MD and SDoC for all the purchased products on board
- <Step2> Record MD/SDoC and screen the products containing HazMat above the threshold level
- <Step3> Identify the location of these products and calculate HazMat mass at each location
- <Step4> Prepare IHM by using standard format

Submission of Material Declaration (MD) for products/equipment Supplier shall identify and declare whether or not the materials listed in Table A & B are present above the threshold value:

Material Declaration (MD)

Information in Material Declaration (MD)

- 1. Date of declaration
- 2. Supplier's name
- 3. Product name
- 4. Product number
- 5. Delivered Unit of the product
- 6. Presence of Hazmat, its mass, and information where it is used

Table B	Mercury and Mercury Compounds	1,000 mg/kg	Yes	10	g
taterials Listed in ppendix 2 of the	Polybrominated Biphenyl (PBBs)	1,000 mg/kg	No		

- Submission of Supplier's Declaration of Conformity (SDoC)
 - ✓ SDoC is to provide assurance of conformity of the related MD, and to identity the responsible entity.
 - ✓ SDoC shall be submitted together with Material Declaration (MD).

Supplier's Declaration of Conformity (SDoC)

Contents to be described in SDoC

- 1. Company name
- 2. Object of declaration such as "Main Engine", "Valves" or "All the products"
- 3. Document for company's policy on chemical substances management
- 4. Person in charge and his/her signature
- 5. Date, place, etc.

SDoC

2015 GUIDELINES FOR THE DEVELOPMENT OF THE INVENTORY OF HAZARDOUS MATERIALS (MEPC.269(68))

- Exemptions- Materials not required to be listed in the Inventory:
- Materials listed in Table B that are inherent in solid metals or metal alloys, provided they are used in general construction, such as hull, superstructure, pipes, or housings for equipment and machinery (MEPC.269(68) 3.3.1);
- Printed Circuit Boards (MEPC.269(68) 3.3.2).

For materials in Table A & Table B applicable to the above exemptions, MD can declare "Present above threshold value" : "NO".

2015 GUIDELINES FOR THE DEVELOPMENT OF THE INVENTORY OF HAZARDOUS MATERIALS (MEPC.269(68))

Products/equipment not need to list in IHM Part I

Regular consumer goods (**Table D**), such as Electrical and electronic equipment, Lighting equipment & Non ship-specific furniture, interior and similar equipment, should be listed in **part III** of the Inventory (MEPC.269(68) 3.2.2).

For "Loosely fitted equipment", there is no need to list this in part I of the Inventory. Such equipment which remains on board when the ship is recycled should be listed in **part III**. (MEPC.269(68) 3.2.3)

Batteries containing lead acid or other hazardous materials that are fixed in place should be listed in part I of the Inventory. Batteries that are loosely fitted, which includes consumer batteries and batteries in stores, should be listed in part III of the Inventory. (MEPC.269(68) 3.2.4)

MD/SDoC for "Regular consumer goods (Table D)", "Loosely fitted equipment" & "Batteries that are loosely fitted" is not required.
