
F7 Portable instruments for measuring oxygen and flammable vapour concentrations

(1971)
(Rev.1 1989)
(Rev.2
May 1999)
(Rev.3
June 2020)

Every oil tanker is to be provided with at least two portable gas detectors capable of measuring flammable vapour concentrations in air (%LEL) and at least two portable O₂ analysers. Alternatively, at least two gas detectors, each capable of measuring both oxygen and flammable vapour concentrations in air (%LEL), are to be provided.

In addition, for tankers fitted with inert gas systems, at least two portable gas detectors are to be capable of measuring concentrations of flammable vapours in ~~inerted atmosphere~~ atmosphere (% gas by volume).

Note:

1. Rev.3 of this UR is to be uniformly implemented by IACS Societies from 1 July 2021.
