June 2021

# Port State Control Annual Report [English]

# -- Introduction of ClassNK software for PSC measures --

# Research on PSC trends of ports and countries

Al technology makes it possible to research trends of typical deficiencies, deficiency items or deficiency categories. You can also confirm actual deficiencies recorded by PSC and graphically illustrate trends.

# **Output of PSC checklists**

Output a pinpoint checklist based on the PSC's past records of selected ports or countries. The check items recorded as detainable deficiencies are displayed in red.

# **Regulation calendar**

Display requirements of the IMO international convention from our site and local regulations informed by our technical information applied on your managing ships in a calendar format.

# **Photographs of Deficiencies**

# **Fire Safety**

Fire hazard due to oil leakage in engine room

Leakage from fire main

Fire door packing deteriorated and detached

# **Fire Safety**

Elec. cables penetration compound missing

# **Life Saving Appliances**

Inappropriate reset of on-load release gear

Inappropriate painter securing

Deteriorated grab line of lifebuoy

# **Load Line**

Broken float disc of air pipe head

Improper freeboard marks

Wasted ventilator

# Machinery Space

Temporary repair on piping without reporting to PSC

Dirty condition in engine room

Dirty condition in engine room

# MARPOL

Wasted and holed on sewage treatment plant

Others

Partly broken mooring rope

# Foreword

This Annual Report on Port State Control (PSC) summarizes deficiencies identified during PSC inspections carried out in various countries around the world. This report is prepared with the objective of building awareness of the present state of PSC and thereby improving future onboard maintenance and inspections as well as Safety Management Systems. The report consists of the following chapters.

Chapter 1: Status of Implementation and Recent Developments in PSC Worldwide

Chapter 2: Statistical Analysis of Detained Ships Registered with ClassNK

Chapter 3: Statistical Analysis of NK SMC Ships Detained by PSC (ISM Code)

Chapter 4: Statistical Analysis of NK MLC Ships Detained by PSC (MLC, 2006)

Chapter 5: Statistical Data from Tokyo MOU, Paris MoU and USCG

Port State Control has been recognized as a very direct and effective means to reduce the number of substandard ships as well as to improve the safety of ships at sea and to prevent marine pollution. The activity of PSC worldwide has significantly been strengthened along with the increasing number of amendments to the relevant international Conventions.

Further to the above, in order to carry out the effective implementation of port state responsibilities, many countries have signed a Memorandum of Understanding (MOU) for regional cooperation among local PSCs, and have agreed to establish a centralized & digitized database system and/or a harmonized approach.

The scope of PSC inspection has been extended from the hardware aspect of the ship to the software aspect such as onboard maintenance or operational procedures ever since the ISM Code was adopted and applied to all ships and it is still expanding as more new concepts of regulations have been introduced by the adoption of NOx Tier III regulation, 2020 global cap of sulphur content in fuel oils, Ship Recycling Convention (the Hong Kong Convention), IMO DCS (EU MRV), etc.

In line with the above progress of PSC, ClassNK has been working hard and will work harder to increase the transparency of information related to PSC and to eliminate substandard vessels.

June 2021

Note: Every effort has been made to ensure the accuracy of the information presented in this report. However, as information is collected from a variety of sources, ClassNK cannot be held responsible for any erroneous data, judgements or conclusions that may appear in this report, in cases where the information available should prove to have been incomplete or incorrect in any respect.

# Chapter 1

# Status of Implementation and Recent Developments in PSC Worldwide

# 1.1 Amendments to the relevant conventions

Major amendments to international conventions and to the relevant regulations that came into effect from 2019 through 2021 are summarized as below.

# 1.1.1 Data collection system for fuel oil consumption of ships Entry into force: 1 March 2018

# [Refer to ClassNK Technical Information TEC-1139, 1187, 1198]

Data collection system for fuel oil consumption of ships (IMO DCS) is applied to ships of 5,000 gross tonnage and above, for which the Ship Energy Efficiency Management Plan (SEEMP) is required to be retained on board. IMO DCS requires the companies to do the following in accordance with methodology included in the SEEMP Part II.

- A) To collect each ship's fuel consumption data and relevant parameters from the calendar year 2019
- B) To aggregate the collected data, and report to the Administration or RO within three (3) months after the end of each calendar year
- C) In the event of the transfer of a ship from one Administration to another and/or a change from one Company to another, to aggregate the collected data, and report to the Administration or RO on the day of completion of the transfer or the change or as close as practical thereto
- D) To provide Statement of Compliance (SOC) onboard the vessel

Further, EU regulation on monitoring, reporting and verification of carbon dioxide emissions (EU MRV) is also applied to ships of 5,000 gross tonnage and above, which arrive at or depart from ports under the jurisdiction of an EU member state. EU MRV requires the companies to develop the Monitoring Plan and submit the Emission Report to the RO accredited by the national accreditation body in EU, and provide a Document of Compliance (DOC) onboard the vessel.

A ship which has not carried out any EEA-related voyages during a whole reporting period (calendar year X) will not be required to have a DOC of specific reporting period (year X) on board, when calling at EEA ports between 30 June of year X+1 and 29 June of year X+2.

Meanwhile, it was reported that the reason for not having DOC might be confirmed from port authority when calling at ports under the jurisdiction of an EU member state. Therefore, it is recommended to be prepared to show past voyage records.

(FAQ of EU MRV: <u>https://ec.europa.eu/clima/policies/transport/shipping\_en#tab-0-3</u>)

# 1.1.2 EU Regulation on Ship Recycling

# Entry into force: 30 December 2013

# [Refer to ClassNK Technical Information TEC-1170, -1185, -1224, -1225]

Development of inventory of hazardous materials (IHM) is required for EU flagged ships and non-EU flagged ships by the following date. In addition, ship owners have to ensure that EU flagged ships are recycled only at the recycling facilities included in the EU List, which list ship recycling facilities authorized in accordance with the Regulation. [Deadline for developing and having an IHM onboard]

- (1) EU flagged new ships: The date of delivery (the building contract on/after 31 December 2018)
- (2) EU flagged existing ships: 31 December 2020 (If a ship is to be recycled before 31 December 2020, IHM shall be prepared prior to recycling)
- (3) Non-EU flagged ships: 31 December 2020

For EU flagged ships, two hazardous materials (PFOS and HBCDD) are added to the Hong Kong Convention. Among them, PFOS is compulsory to EU flagged existing ships (EU flagged new ships are prohibited to carry PFOS). Therefore, even if an IHM complying with the Hong Kong Convention is provided onboard the EU flagged existing ship, checking of PFOS is additionally required to comply with the EU regulation.

On the other hand, considering the estimated disruptions that several thousand ships are likely to be unable to comply with the IHM obligations and have the required certification by the deadline on 31 December 2020 due to COVID-19 restrictions, the EC has published a Commission Notice suggesting EU member States apply a harmonized approach towards enforcement during ship inspections for a limited period of 6 months from 31 December 2020 to 30 June 2021.

When a vessel not carrying a valid IHM and/or accompanying certificate on board calls at a port in an EU member state after December 31 2020, the shipowner or the master should provide "a service contract for sampling or a survey (quoted from the Commission Notice)" as evidence that all possible steps have been taken to obtain an IHM (including a "semi-completed IHM") certification, and documents showing why the semi-completed IHM could not be obtained.

(Information on Ship Recycling:

https://www.classnk.or.jp/hp/en/activities/statutory/shiprecycle/index.html)

# 1.1.3 2020 global cap of sulphur content in fuel oils

# Entry into force: 1 January 2020

# [Refer to ClassNK Technical Information TEC-1192]

In order to reduce emissions of Sulphur Oxides (SOx) and Particulate Matter (PM) from ships, the limit of the sulphur content of any fuel oil used on board ships was tightened to 0.50% m/m outside emission control areas (ECAs) from 1 January 2020. In case any equivalent means as long as the reduction method is evaluated to be equivalent to the required reduction of SOx are not installed onboard, the loading of non-compliant fuel oil is prohibited except for non-availability of compliant fuel oil.

# 1.1.4 Maintenance for lifeboats etc.

# Entry into force: 1 January 2020

# [Refer to ClassNK Technical Information TEC-1183]

On or after 1 January 2020, thorough examinations, operational tests, overhaul and repair of the lifeboat etc. are to be conducted by certified personnel of either the manufacturer or an authorized service provider in accordance with IMO Resolution MSC.402(96). In addition, personnel for the work is to be certified for each manufacturer and type of equipment to be worked on.

# 1.1.5 Electronic record books

# Entry into force: 1 October 2020

# [Refer to ClassNK Technical Information TEC-1192]

MARPOL Convention requires that ships are provided with several record books for the purpose of management of pollution prevention. On and after 1 October 2020, approval of the electronic record books is needed for these record books in accordance with Guidelines for the use of electronic record books under MARPOL if the electronic record books are used in spite of paper ones.

# 1.1.6 Application of Cyber Risk Management Entry into force: 27 October 2020 [Refer to ClassNK Technical Information TEC-1217]

The USCG expects all companies with U.S. flagged vessels and foreign flagged vessels that call at ports in the U.S. to ensure that cyber risk management is appropriately addressed in their SMS.

If objective evidence indicating that the foreign flagged vessel that calls at ports in the U.S. failed to implement its SMS with respect to cyber risk management is identified, the following actions should be directed by the PSCO:

- If cyber risk management has not been incorporated into the vessel's SMS by the company's first annual verification of the DOC after 1 January 2021, a deficiency should be issued with action code 30 - Ship Detained.
- (2) When objective evidence indicates that the vessel failed to implement its SMS with respect to cyber risk management, a deficiency for both an operation and an ISM should be issued with an action code 17 - Rectify Prior to Departure or an action code 30 – Ship Detained depending on its seriousness.

<u>New amendments to conventions are also introduced on the ClassNK Website in the section, 'IMO</u> <u>International Convention Calendar'.</u> (http://www.classnk.or.jp/hp/en/imo\_conv\_schedule/)

3

# **1.2 Recent global developments**

# 1.2.1 MOUs around the world

In order to carry out PSC effectively, a recommendation concerning regional co-operation in the control of ships and discharges was adopted as a resolution by the IMO. In July 1982, fourteen European countries signed the Paris Memorandum of Understanding on Port State Control (Paris MoU), and today many countries have signed and accepted similar MOUs around the world. Currently, nine MOUs exist around the world and their respective activities in terms of implementing PSC are described below.

| European and North Atlantic region | : Paris MoU                | ( <u>https://www.parismou.org/</u> )  |
|------------------------------------|----------------------------|---------------------------------------|
| Asia-Pacific region                | : Tokyo MOU                | ( <u>http://www.tokyo-mou.org/</u> )  |
| Latin American region              | : Latin American Agreement | (http://www.acuerdolatino.int.ar/)    |
| Caribbean region                   | : Caribbean MOU            | (https://www.caribbeanmou.org/)       |
| Mediterranean region               | : Mediterranean MoU        | (http://www.medmou.org/)              |
| Indian Ocean region                | : Indian Ocean MOU         | (https://www.iomou.org)               |
| Black Sea region                   | : Black Sea MOU            | (http://www.bsmou.org/)               |
| West and Central Africa region     | : Abuja MoU                | ( <u>http://www.abujamou.org/</u> )   |
| Arab States of the Gulf            | : Riyadh MoU               | ( <u>https://www.riyadhmou.org/</u> ) |

# (1) European and North Atlantic region (Paris MoU)

Established: 1 July 1982

- Members: Belgium, Bulgaria, Canada, Croatia, Cyprus, Denmark, Estonia, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Latvia, Lithuania, Malta, the Netherlands, Norway, Poland, Portugal, Romania, the Russian Federation, Slovenia, Spain, Sweden, and the United Kingdom
- -1. The Paris MoU consists of 27 participating maritime Administrations and covers the waters of the European coastal States and the North Atlantic basin from North America to Europe. The Paris MoU states that their aim is to eliminate the operation of sub-standard ships through a harmonized system of PSC.
- -2. Press releases have announced the recent activities of the Paris MoU as follows. <u>Press releases dated 26 March and 8 May 2020</u>
  - Temporary guidance for Member Authorities during the COVID-19 crisis has been developed.

Press release dated 16 June 2020

- The CIC on "Stability in general" scheduled to be held from September to November 2020 have been postponed until 2021.

Press release dated 1 July 2020

- The Paris MoU announced new performance lists for flag and Recognized Organizations. These lists take effect from 1 July 2020.

Press release dated 9 October 2020

- The Paris MoU held its 53rd Committee meeting by virtual means from 28 September to 2 October 2020.

Press release dated 4 June 2021

- The Paris MoU held its 54th Committee meeting by virtual means from 17 to 21 May 2021. <u>Press release dated 15 June 2021</u>

- The Paris MoU announced new performance lists for flag and Recognized Organizations. These lists take effect from 1 July 2021.

# (2) Asia-Pacific region (Tokyo MOU)

Established: 1 December 1993

- Members: Australia, Canada, Chile, China, Fiji, Hong Kong, Indonesia, Japan, Republic of Korea, Malaysia, Marshall Islands, New Zealand, Panama, Papua New Guinea, Peru,
  - Philippines, the Russian Federation, Singapore, Thailand, Vanuatu, Vietnam
- -1. The main objectives of the Memorandum have been announced
  - 1. to establish an effective Port State Control regime in the Asia-Pacific region through the co-operation of its members and the harmonization of their activities,
  - 2. to eliminate substandard shipping so as to promote maritime safety,
  - 3. to protect the marine environment, and
  - 4. to safeguard working and living conditions onboard ships.
- -2. Press releases announced the activities of the Tokyo MOU as follows: Press release dated 2 March 2020
  - The Tokyo MOU announced the preliminary results of the Concentrated Inspection Campaign (CIC) on Emergency Systems and Procedures, which was conducted from 1 September to 30 November 2019.
  - During the course of the campaign, Authorities carried out a total of 7,174 inspections of target ships. Of this quantity, 55 ships were detained as a result of deficiencies found during the CIC.

Press releases dated 12 March and 10 April 2020

- Temporary guidance for Member Authorities during the COVID-19 crisis has been developed.

Press release dated 16 June 2020

- The CIC on "Stability in general" scheduled to be held from September to November 2020 have been postponed until 2021.

Press release dated 26 January 2021

- The Tokyo MOU held its 31st meeting remotely via virtual means from 21 to 22 January 2021.
- The Committee unanimously agreed to grant observer status to Cambodia.
- The Committee took note of the amended schedule for future joint CICs due to the COVID-19 pandemic, i.e., CIC on STCW in 2022, CIC on Fire Safety in 2023 and CIC on Crew Wages and Seafarer Employment Agreement under MLC in 2024. The Committee considered and agreed to accept the proposal by the Paris MoU to carry out a CIC on Ballast Water Management (BWM) in 2025.

Press release dated 1 March 2021

- Interim guidance relating to COVID-19 circumstances has been developed. <u>Press release dated 9 March 2021</u>

- The guidance on remote PSC inspection has been developed and Remote PSC inspection has been launched from 1 April 2021.

# (3) Latin-American region (Latin American Agreement)

Established: 5 November 1992

Members: Argentina, Bolivia, Brazil, Chile, Colombia, Cuba, Ecuador, Guatemala, Honduras, Mexico, Panama, Peru, Republic of Dominica, Uruguay, and Venezuela

### (4) Caribbean region (Caribbean MOU)

Established: 9 February 1996

Members: Antigua and Barbuda, Aruba, the Bahamas, Barbados, Belize, Bermuda, the Cayman Islands, Cuba, Curacao, France, Grenada, Guyana, Jamaica, the Netherlands, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Sint Maarten, Suriname, and Trinidad and Tobago

#### (5) Mediterranean region (Mediterranean MoU)

Established: 11 July 1997 Members: Algeria, Cyprus, Egypt, Israel, Jordan, Lebanon, Malta, Morocco, Tunisia, and Turkey

### (6) Indian Ocean region (Indian Ocean MOU)

Established: 5 June 1998

- Members: Australia, Bangladesh, Comoros, Eritrea, France (La Reunion), India, Iran, Kenya, Maldives, Mauritius, Madagascar, Mozambique, Myanmar, Seychelles, South Africa, Sri Lanka, Sudan, Sultanate of Oman, Tanzania, and Yemen
- -1. According to Annual Report 2020 of the Indian Ocean MOU, a total of 4,762 inspections were carried out and 218 vessels were detained in 2020.
- -2. Temporary guidance for Member Authorities during the COVID-19 crisis has been developed.

### (7) Black Sea region (Black Sea MOU)

Established: 7 April 2000

Members: Bulgaria, Georgia, Romania, the Russian Federation, Turkey, and Ukraine According to Annual Report 2020 of the Black Sea MOU, a total of 5,721 inspections were carried out and 241 vessels were detained in 2020.

### (8) West and Central Africa region (Abuja MoU)

Established: 22 October 1999

Members: Angola, Benin, Cameroun, Cape Verde, Congo, Cote D'Ivoire, Democratic Republic of

Congo, Equatorial Guinea, Gabon, The Gambia, Ghana, Guinea, Guinea Bissau,

Liberia, Mauritania, Namibia, Nigeria, Sao Tome and Principe, Sierra Leone, Senegal,

South Africa, and Togo

According to Annual Report 2020 of the Abuja MoU, a total of 2,337 inspections were carried out and 9 vessels were detained in 2020.

# (9) Arab States of the Gulf (Riyadh MoU)

Established: 30 June 2004

Members: Kingdom of Bahrain, Kingdom of Saudi Arabia, State of Kuwait, State of Qatar, State of United Arab Emirates, and Sultanate of Oman

### 1.2.2 Port State Control in the United States (USCG)

### (1) Activity

Although the United States Coast Guard (USCG) is not a member of any MOU, it is an observer at a number of MOUs, and undertakes effective PSC in cooperation with other MOUs. In the 1970's, the U.S. Coast Guard increased its emphasis on the examination of foreign vessels. Although this emphasis was primarily driven by requirements to ensure compliance with the then new U.S. pollution prevention and navigation safety regulations, boarding officers also exercised Port State authority when instances of non-compliance with SOLAS and MARPOL were noted. In 1994, the U.S. introduced risk-management methodologies into the Port State Control program in order to allocate limited inspection resources to where they could do the most good, by identifying those ships, ship owners, classification societies and Flag Administrations that were most often found lacking in meeting their international Convention responsibilities. On 1 January 2001, the USCG implemented an initiative to identify high-quality ships, called QUALSHIP 21, quality shipping for the 21st century. This program has since proven to be very effective in recognizing well operated and maintained ships of good quality and continues in use today. Further, on 1 July 2017, in addition to QUALSHIP 21, the program of E-ZERO (Zero Environmental Deficiencies or Violations) began. E-ZERO designation has been assigned with exemplary vessels that have consistently adhered to environmental compliance.

### (2) PSC Safety Targeting Matrix

The USCG uses the Port State Control Safety and Environmental Protection Compliance Targeting Matrix which enables the Coast Guard to rationally and systematically determine the probable risk posed by non-U.S. ships calling at U.S. ports. The matrix is used to decide which ships Port State Control Officers should examine on any given day, in any given port. The numerical score, along with other performance-based factors, determines a ship's priority for examination.

#### (3) Banning of foreign vessels

All foreign flagged vessels operating in U.S. waters are required to be maintained in compliance with U.S. regulations, international conventions and other required standards. However, when a vessel has been repeatedly detained by the USCG (totaling three detentions within a twelve-month period) and it is determined that failure to effectively implement the SMS onboard may be a contributing factor for the substandard conditions that led to the detentions, the USCG Headquarters (USCG-HQ) will issue a Letter of Denial prohibiting the ship from further entering any U.S. port until such time as certain actions have been taken to rectify the situation. However, even if a vessel has less than three detentions in twelve months, a Letter of Denial may be issued to any vessel which, in the option of the USCG;

- 1. may pose a significant risk to the safety of the vessel, crew or the marine environment; or
- 2. has a history of accidents, pollution incidents, or serious repair problems which creates reason to believe that such a vessel may be unsafe or create a threat to the marine environment; or
- 3. has discharged oil or other hazardous material in violation of any law of the United States or in a manner or quantities inconsistent with the provisions of any treaty to which the United States is a party.

(Reference: http://www.uscg.mil)

## 1.3 Measures adopted by ClassNK

## 1.3.1 Handling of the Deficiencies Identified by PSC Inspections

## (1) Cooperative assistance with PSC and treatment of deficiencies

When surveyors of the Society are notified of the detention of a ship classed with ClassNK, the Society actively cooperates with the reporting PSC in a number of ways. The more direct of these steps include the following.

- Surveyors liaise with PSC to ensure that they are called in as soon as appropriate when deficiencies related to class and/or statutory matters are identified.
- Surveyors liaise with PSC officers to ensure uniformity of interpretation of class and statutory requirements.
- Surveyors provide PSC officers with background information, extracts from reports pertinent to the inspection, and details of conditions of class and statutory items whenever so requested by the PSC.
- Attending surveyors examine not only the condition of the deficiencies identified by the PSC officers but also expand the scope of the survey for the general condition of the hull, machinery and equipment, or carry out the general examination to the extent of an annual survey if necessary, carefully considering the seriousness of any deficiencies when they attend ships that have been subject to an intervention action by the PSC.

# (2) Treatment of inspection reports by PSC officers

When a surveyor receives an inspection report from PSC, the report is sent to the ClassNK Head Office. The report is immediately examined by the experienced staff to identify the causes of the deficiencies. This examination is carried out for all ships for which such reports are received, and the results are circulated to all sections concerned, as necessary. The results are also reflected in a ClassNK PSC database that has been developed for the purpose of providing surveyors with PSC related information electronically. The results of this examination are also submitted to the Flag State Administration of the ship, as required. Further, visits may also be made to the management company or others, when deemed appropriate, to advise them of the relevant deficiencies noted and to encourage them to more proactively improve the routine maintenance of their ships and take other measures as necessary to ensure the highest levels of safe and environmentally friendly operation. In cases where the deficiencies pointed out by the PSC are determined to be related to previous surveys conducted by surveyors of the Society, those surveys are treated as a non-conforming service, and appropriate corrective and preventive actions are taken in accordance with the ClassNK quality system.

# 1.3.2 Minimizing the number of detained ships in order to reduce substandard ships(1) Special training at several in-house meetings

Special training on PSC related issues is conducted at several meetings held regularly for general managers and managers, to ensure that surveyors carry out full and effective surveys with an uncompromising attitude towards ensuring the quality and safety of the ships classed with the Society.

Special re-training is also carried out under the supervision of the Head Office and regional managers, as needed, for those surveyors who have conducted any surveys determined to be a non-conforming service under the quality system of the Society.

# (2) Meetings and informal gatherings with management companies

# (a) Visiting Management Companies

When a ship classed with ClassNK is detained by PSC, if deemed necessary, a senior surveyor or manager of the Society visits the company managing the ship to discuss what steps can be taken to improve the routine maintenance of the ships in their fleet, so as to prevent both a recurrence of the deficiencies noted and the occurrence of similar problems in the future.

### (b) Meetings and seminars

PSC related issues are regularly discussed at informal gatherings and technical committee meetings held with management companies. At such times, explanations are given and documents are presented, with emphasis placed on the importance of proactively ensuring the proper maintenance of ships and education of crew in order to prevent the detention of ships.

# (c) Software

Software "PrimeShip-PSC Intelligence" and Mobile application "ARRIVAL CHECKLIST for PSC" have been prepared in order to support an improvement of PSC performance and ship management systems.

# i) PrimeShip-PSC Intelligence (<u>http://www.classnk.or.jp/hp/en/activities/portal/psc-intelligence.html</u>)

This system provides users with various functions to help improve fleet PSC performance and ship management systems.

[Main Functions]

- Easy visual checking of trends of typical deficiencies, deficiency items or deficiency categories at each port or country on world-map with AI technologies
- Output a pinpoint checklist based on the PSC's past records of selected ports or countries
- Analysis on the trend of deficiencies recorded on managing ships on a real-time basis through the managing company's input of PSC reports
- Freely set KPIs and ship groups in order to monitor, measure and evaluate them
- Output a summary report for PSC performance of managing ships
- Display requirements of the IMO international convention and local regulations applied on managing ships in a calendar format

### ii) ARRIVAL CHECKLIST for PSC (http://www.classnk.or.jp/hp/en/info\_service/psc/)

A preparatory checklist mobile app to help minimize the risk of PSC detentions and deficiencies. [Main Functions]

- The items frequently pointed out by PSCO can be checked in each area onboard
- Check results can be input in the system along with notes and photos
- Check results can be forwarded to companies easily
- The statistics and tendency of detentions in major ports can be confirmed
- Checklists and statistics are updated automatically as needed

### (d) Publications

The "ClassNK Annual Report on Port State Control" and a checklist entitled "Good Maintenance on board Ships", which can be used by the ship's crew for quick and easy inspection of a ship before entering port, are distributed to all registered management companies or others in the ClassNK fleet and also posted on NK website as below. (http://www.classnk.or.jp/hp/en/info\_service/psc/)

Twenty-two "ClassNK PSC Bulletin" were released as of June 2021. This bulletin provides timely information on particularly notable deficiencies pointed out during PSC inspections of NK classed ships and will be continuously provided to management companies.

### 1.3.3 Visits to PSC authorities

Designated persons from the ClassNK Head Office as well as local survey offices are assigned to visit the headquarters or offices of various PSC authorities with the aim of introducing ClassNK and exchanging views on matters of mutual concern. However, considering the circumstances due to the COVID-19 pandemic, ClassNK refrained from visiting PSC authorities in 2020.

# Chapter 2

# Statistical Analysis of Detained Ships Registered with ClassNK

# 2.1 General

The data in this chapter, on ships detained due to deficiencies identified during PSC inspections, is based on the following sources:

(1) Notifications from Port States issued in accordance with IMO Resolution A.1138(31) "Procedure for Port State Control, and

(2) Publications related to detained ships issued by the Tokyo MOU, the Paris MoU, and the USCG. From January to December 2020, 250 PSC detentions were reported relating to 242 ships classed by NK. This included cases of detention for reasons not related to class or to NK itself. The total number of NK-registered ships (500 GT or over) was 8,546 at the end of December 2020. Therefore, detention ratio (Detentions/Registered number in 2020) of the NK fleet in 2020 was about 2.9%.

Table 2.2.2 Detentions per Ship Type

Among the dry cargo ships with large numbers, a detention ratio of General cargo ships was identified as having a higher detention ratio than other ship types noted. ('Detention ratio' was determined by dividing the number of detentions by the number of ships of each respective ship type in the NK fleet.)

# 2.2.3 Detentions per Ship's Age

Table 2.2.4 Detentions per Ship Size (Gross Tonnage)

A detention ratio of ships with GT up to 40,000 tends to be higher than that of vessels with GT over 40,000.

Fig. 2.2.4-1 No. of Detentions per Ship Size (Gross Tonnage)

Fig. 2.2.4-2 Detention Ratio per Ship Size (Gross Tonnage) (%)

# 2.2.5 Detentions per PSC Country

| Country                        | 2018        | 2019    | 2020 |                 |
|--------------------------------|-------------|---------|------|-----------------|
| Australia                      | 53          | 61      | 66   | Austral         |
| Russia                         | 49          | 36      | 35   |                 |

Fig. 2.2.5 No. of Detentions per PSC Country

Number of ships detained in China in 2020 significantly decreased compared with that of 2019.

# 2.2.6 Detentions per MOUs and USCG

| Region    | 2018 | 2019 | 2020 |  |  |  |  |  |  |
|-----------|------|------|------|--|--|--|--|--|--|
| Tokyo MOU | 218  | 265  | 142  |  |  |  |  |  |  |
| Paris MoU | 65   | 56   | 44   |  |  |  |  |  |  |
| USCG      | 24   | 18   | 10   |  |  |  |  |  |  |
| Others    | 77   | 55   | 54   |  |  |  |  |  |  |
| Total     | 384  | 394  | 250  |  |  |  |  |  |  |

# Table 2.2.6 No. of Detentions per MOUs and USCG

Fig. 2.2.6 No. of Detentions per MOUs and USCG

Compared with number of 2019, the number of detentions at Tokyo MoU, Paris MoU and USCG in 2020 all decreased.

### 2.3 Analysis of Detainable Deficiencies

### 2.3.1 Detainable Deficiencies per Category

In 2020 a total of 658 detainable deficiencies were reported relating to 250 detentions, i.e., deficiencies which were serious enough to jeopardise the ship's seaworthiness, safety of the crew onboard, or to present a threat of harm to the environment and therefore warranted the detention of the ship. The deficiencies are categorized as shown in Figure 2.3.1 and categories in this figure are based on those of the Tokyo MOU. Deficiencies related to Fire safety, Life-saving appliances, and Emergency systems combined accounted for about one-third of the total in 2020.

Fig. 2.3.1 No. of Detainable Deficiencies per Category

#### 2.3.2 Detainable Deficiencies per Defective item

Figure 2.3.2 shows those items of detainable deficiencies that were reported frequently, in conjunction with the actual detention of ships in the NK fleet. ISM, Emergency generators, and Emergency fire pumps continue to be the major items where most detainable deficiencies were found. The items reported from 2018 to 2020 are explained in detail in paragraphs (1) to (15) below. (Regarding details of deficiencies related to ISM and MLC, refer to Chapter 3 and Chapter 4.)

Fig. 2.3.2 No. of Detainable Deficiencies per detective item

# (1) Fire Safety

Major types and details of deficiencies noted under the category of "Fire Safety" are shown in Table 2.3.2-(1) below.

| Item  | 2018 | 2019 | 2020 | Noted Deficiencies  |
|---|------|------|------|---|
| Fire detection and alarm system                     | 20   | 19   | 16   | Inoperable  |
| Oil accumulation in engine room                     | 5    | 12   | 16   | Fire hazard due to oil leakage from equipment in Engine Room                      |
| Fire-dampers  | 34   | 40   | 15   | Wasted/Inoperable fire-dampers  |
| Fire pumps and its pipes                            | 24   | 23   | 12   | Malfunction of fire pump (incl. for emergency)<br>Wasted and holed fire main line |
| Fire doors/openings in fire-<br>resisting divisions | 38   | 20   | 10   | Poor closing condition of fire door   |
| Fixed fire extinguishing installation               | 18   | 29   | 10   | Wasted and holed CO <sub>2</sub> pipes  |

# Table 2.3.2-(1) Fire Safety

# (2) ISM related deficiencies

For details of deficiencies, refer to Chapter 3.

# (3) Life Saving Appliances

Major types and details of deficiencies noted under the category of "Life Saving Appliances" are shown in Table 2.3.2-(3) below.

| Item  | 2018 | 2019 | 2020 | Noted Deficiencies  |
|---|------|------|------|---|
| Lifeboats   | 45   | 45   | 21   | Lifeboat engine not started<br>Poor maintenance of rechargeable batteries<br>Inoperable on-load release gears |
| Rescue boats                                      | 16   | 16   | 10   | Rescue boat engine not started<br>Poor maintenance of rechargeable batteries                                  |
| Operational readiness of<br>lifesaving appliances | 4    | 8    | 7    | Inoperable on-load release gear   |
| Launching arrangements for survival craft         | 8    | 11   | 6    | Inoperative davit   |
| Launching arrangements for rescue boats           | 20   | 8    | 4    | Inoperative davit   |
| Immersion suits                                   | 3    | 1    | 4    | Unsuitable size   |

Table 2.3.2-(3) Life Saving Appliances

# (4) Emergency Systems

Major types and details of deficiencies noted under the category of "Emergency Systems" are shown in Table 2.3.2-(4) below.

| Item   | 2018 | 2019 | 2020 | Noted Deficiencies  |
|--|------|------|------|---|
| Emergency source of power -<br>emergency generator | 24   | 32   | 23   | Emergency generator unable to start<br>automatically or manually<br>Emergency generator unable to<br>automatically connect Emergency<br>Switchboard |
| Emergency fire pump and its pipes                  | 33   | 27   | 22   | Inoperable<br>Insufficient discharge pressure   |
| Emergency lighting, batteries and switches         | 15   | 20   | 7    | Deficient batteries<br>Inoperable/wasted/damaged emergency<br>lights  |

# Table 2.3.2-(4) Emergency Systems

# (5) Safety of Navigation

Major types and details of deficiencies noted under the category of "Safety of Navigation" are shown in Table 2.3.2-(5) below.

| Table 2.3.2-(5) Salety of Navigation  |      |      |      |  |  |  |  |  |  |

A total of 10 detainable deficiencies relating to 4 detentions were noted in 2020. (2.5 detainable deficiencies/detention)

## Chapter 3 Statistical Analysis of NK SMC Ships Detained by PSC (ISM Code)

#### 3.1 General

This chapter presents statistical analysis from the viewpoints of ISM Code, on the ships holding a Safety Management Certificate (hereafter, "SMC") issued by the Society (hereafter, "NK SMC ships") based on PSC Inspection Reports NK has obtained.

Table 3.1 shows the registered number of the NK SMC ships. The NK class ships account for 90.4% of the NK SMC ships.

| Classification | 2018  |       | 20    | 19    | 2020  |       |  |  |  |  |
|----------------|-------|-------|-------|-------|-------|-------|--|--|--|--|
| NK class       | 4,968 | 90.0% | 5,116 | 90.0% | 5,220 | 90.4% |  |  |  |  |
| Other class    | 549   | 10.0% | 569   | 10.0% | 554   | 9.6%  |  |  |  |  |
| Total          | 5,517 |       | 5,685 |       | 5,774 |       |  |  |  |  |

| Table 3.1 | Number   | of NK | SMC  | Shins | (per Class) |   |
|-----------|----------|-------|------|-------|-------------|---|
|           | NUITIDEI |       | SINC | Jups  |             | 1 |

Note: The numbers refer to ships engaged in international voyages including those under 500 gross tonnage

#### 3.2 Statistics of Detentions of NK SMC Ships

In 2020, the total number of detentions of NK SMC ships was 181, which was 3.1% of all NK SMC ships, or 5,774 (hereafter, "Detention Ratio").

Tables 3.2.1 and Table 3.2.2 show the number of detentions and the Detention Ratio per flag and ship type, respectively.

| Table 5.2.1 Number of Detentions and Detention Natio of NY Onio Omps per ridg |      |       |       |      |       |       |      |       |       |  |

#### 3.3 Study of ISM Detainable Deficiencies

This clause introduces studies of ISM detainable deficiencies recorded in Australia, Ukraine and Belgium which are the top 3 countries with the highest number of ISM detention cases in 2020 and a part of objective evidences of the ISM detention by each country.

Deficiency Codes of ISM deficiencies specified by Tokyo MOU which Australia participates in are as follows in table 3.3. Also, a deficiency code of ISM deficiencies specified by Black Sea MOU which Ukraine participates in and Paris MOU which Belgium participates in is only "15150 - ISM".

| Def. Code | ISM Code Element | Defective Item                                     |  |  |  |  |
|-----------|------------------|--|--|--|--|--|
| 15101     | 2                | Safety and Environmental Policy                    |  |  |  |  |
| 15102     | 3                | Company Responsibility and Authority               |  |  |  |  |
| 15103     | 4                | Designated Person(s)                               |  |  |  |  |
| 15104     | 5                | Masters Responsibility and Authority               |  |  |  |  |
| 15105     | 6                | Resources and Personnel                            |  |  |  |  |
| 15106     | 7                | Shipboard Operations                               |  |  |  |  |
| 15107     | 8                | Emergency Preparedness                             |  |  |  |  |
| 15108     | 9                | Reports of Non-conf., accidents & hazardous occur. |  |  |  |  |
| 15109     | 10               | Maintenance of the ship and equipment              |  |  |  |  |
| 15110     | 11               | Documentation- ISM                                 |  |  |  |  |
| 15111     | 12               | Company Verification, Review and Evaluation        |  |  |  |  |
| 15112     | 13               | Certification, Verification and Control            |  |  |  |  |
| 15199     | -                | Other (ISM)  |  |  |  |  |

#### Table 3.3 Deficiency Code per ISM Code Element (Tokyo MOU)

| Deficiency Co | de per ISM Code Eleme | ent (Paris MOU, Black Sea MOU) |
|---------------|-----------------------|--------------------------------|
|               |                       |                                |

| 15150     | ISM            |

#### 3.3.1 Australia

Table 3.3.1(a) shows the number of ISM detainable deficiencies per Deficiency Code. Table 3.3.1(b) shows the number of deficiencies regarded as the evidences of ISM detainable deficiencies per Deficiency Code. In Australia, "15199 - Other (ISM)" was most frequently recorded as an ISM detainable deficiency. For the case where plural ISM code elements corresponding to the objective evidences of ISM detainable deficiency are mainly as follows.

- Oily sludge accumulated in galley exhaust duct
- Malfunction of safety devices of generator engines
- Damage and/or wastage of securing devices (cleats) or cleat crutches of cargo hatch covers
- Standard compass error not determined once a watch
- Malfunction of fire damper's operations
- Crew unfamiliar with operation of ECDIS
- Not having the latest and/or corrected charts

#### Table 3.3.1(a) Number of ISM Detainable Deficiencies per Deficiency Code

| Code  | DEF_ITEM                              | 2018 | 2019 | 2020 |
|-------|---------------------------------------|------|------|------|

#### 3.3.2 Ukraine

Table 3.3.2(a) shows the number of the ISM detainable deficiencies per Deficiency Code. Table 3.3.2(b) shows the number of deficiencies regarded as objective evidences of ISM detainable deficiencies per Deficiency Code. Typical objective evidences of the ISM detainable deficiency are mainly as follows.

- Logbook not properly recorded
- Malfunction of remote pump control system (F.P.T, bos'n store)
- Crew unfamiliar with fire drills
- Crew incapable of properly putting on immersion suits
- · Controls of access to ships not properly implemented
- Crew unfamiliar with garbage collection and disposal procedure

#### Table 3.3.2(a) Number of ISM Detainable Deficiencies per Deficiency Code

#### 3.3.3 Belgium

Table 3.3.3(a) shows the number of ISM detainable deficiencies per Deficiency Code. Table 3.3.3(b) shows the number of deficiencies regarded as the evidences of ISM detainable deficiencies per Deficiency Code. Typical objective evidences of the ISM detainable deficiency are mainly as follows.

- Invalid seafarers' employment agreement
- Damage to lighting fittings and/or electric cables
- Malfunction of fuel oil shut-off valves
- Damage to side ropes and/or steps of pilot ladder
- Not having the latest nautical publications
- Malfunction of self-igniting lights of lifebuoys
- Inappropriate entries in ballast water record book
- · Crew not receiving full monthly wage in accordance with their employment agreements

## Chapter 4 Statistical Analysis of NK MLC Ships Detained by PSC (MLC, 2006)

#### 4.1 General

This chapter presents statistical analysis from the viewpoints of MLC, 2006 on the ships holding a Maritime Labour Certificate issued by the Society (hereafter, "NK MLC ships") based on the PSC Inspection Reports obtained. Table 4.1 shows the registered number of the NK MLC ships. About 89% of the NK MLC ships are classed with the Society.

| Classification | 2018  |       | 2019  |       | 2020  |       |
|----------------|-------|-------|-------|-------|-------|-------|
| NK class       | 4,588 | 88.4% | 4,847 | 88.6% | 4,957 | 89.3% |
| Other class    | 603   | 11.6% | 623   | 11.4% | 596   | 10.7% |
| Total          | 5,191 |       | 5,470 |       | 5,553 |       |

#### Table 4.1 Number of NK MLC Ships (per Class)

#### 4.2 Statistics of Detentions of NK MLC Ships

As of the end of April 2021, 97 countries have ratified MLC, 2006 and many countries have been carrying out PSC inspections based on the convention. For detailed situations of the enforcement by the countries, please refer to the following website of ILO.

http://www.ilo.org/dyn/normlex/en/f?p=NORMLEXPUB:11300:0::NO:11300:P11300\_INSTRUMENT\_ID:312331:NO

The table 4.2 shows the number of detention cases due to deficiencies related to MLC, 2006 (hereafter, "MLC deficiencies") for NK MLC ships in the last 3 years.

| labi | Table 4.2 Number of Detention Cases due to MLC Deficiencies (per PSC country) |      |      |      |  |  |
|------|---|------|------|------|--|--|
|      | Country   | 2018 | 2019 | 2020 |  |  |
|      | Australia   | 2    | 4    | 6    |  |  |
|      | Canada  | 2    | 1    | 3    |  |  |
|      | Japan   | 0    | 0    | 3    |  |  |

|      | Other Countries   | 6    | 4    | 2    |  |  |
|      | Total   | 23   | 18   | 32   |  |  |

#### Table 4.2 Number of Detention Cases due to MLC Deficiencies (per PSC country)

#### 4.3 Study of MLC Detainable Deficiencies

This clause introduces the studies of detainable deficiencies related to MLC, 2006 (hereafter, "MLC detainable deficiencies") and MLC deficiencies recorded as objective evidences of ISM detainable deficiencies for NK MLC ships in 2020. In this Chapter, the deficiencies with Codes listed in Table 4.3.1 are defined as MLC deficiencies.

The number of MLC detainable deficiencies per the deficiency code is shown in Table 4.3.2. Also, top 10 MLC deficiencies regarded as objective evidences of ISM detainable deficiencies are shown in Table 4.3.3. As for the MLC detainable deficiencies, "01220 - Seafarers' employment agreement (SEA)" was most frequently recorded on NK MLC ships in 2020. And "18203 - wages" followed it.

On the other hand, the top 3 deficiencies recorded as objective evidences of ISM detainable deficiencies in MLC deficiencies are as follows.

- Top.1: "01220 Seafarers' employment agreement (SEA)" (11)
- Top.1: "18420 Cleanliness of engine room" (11)
- Top.3: "01308 Records of rest" (5)

# (Reference) PSC Inspections on Working and Living Conditions in Countries not ratifying MLC, 2006

Regarding the matters of ILO, Tokyo MOU, Paris MOU and other MOUs had been carrying out PSC inspections using the deficiency code 09000 series "Working and Living Conditions" since before implementation of MLC, 2006. These codes are still used by the countries in which MLC, 2006 has not yet come into force. Table 4.3.4 shows the number of detainable deficiencies with the Code pointed out in 2020.

| Code  | Item                       | No. |
|-------|----------------------------|-----|
| 092xx | Working Conditions         |     |
| 09232 | Cleanliness of engine room | 1   |
|       | Total                      | 1   |

 Table 4.3.4 Number of ILO Detainable Deficiencies (per Deficiency Code)

## Chapter 5

## Statistical Data from Tokyo MOU, Paris MoU and USCG

Several regional MOUs and Port States publicly announce their PSC data on their websites and publish Annual Reports every year. Based on the public data available, this Chapter introduces abstracts of the recent results of detentions by the Tokyo MOU, the Paris MoU and the USCG in 2020.

The full text of each respective Annual Report can be obtained from the following websites.

Tokyo MOU Paris MoU USCG http://www.tokyo-mou.org https://www.parismou.org/ https://www.uscg.mil/

#### 5.1 Tokyo MOU

In 2020, 19,415 inspections were carried out in the Tokyo MOU region, and 493 ships were detained due to serious deficiencies found onboard.

#### 5.1.1 Port State Inspections carried out by Authorities

Table 5.1.1 shows the numbers of Port State inspections carried out by each Port State from 2018 through 2020.

| Country                         | No.    | of Inspec | tion No. of Detentions |      | Detention ratio (%) |      |       |       |      |

(\*) According to the Tokyo MOU annual report, in cases where a ship's certificates were issued by more than one recognized organization (RO), the number of inspections would be counted towards both organizations, while the number of detentions would be counted only towards the RO that issued the certificate relating to the detainable deficiency or deficiencies.

#### 5.1.4 Deficiencies per Category

Figure 5.1.4 shows the number of deficiencies by category for the three years from 2018 through 2020.

Fig. 5.1.4 Deficiencies per Category (Tokyo MOU)

#### 5.2 Paris MoU

In 2020, 13,148 inspections were carried out in the Paris MoU region, and 369 ships were detained due to serious deficiencies found onboard.

#### 5.2.1 Port State Inspections carried out by Authorities

Table 5.2.1 shows the numbers of Port State Inspections carried out by each respective Port State from 2018 through 2020.

| Country              |       | of Inspect |       |      | of Detent |      | •    | ntion ratio | o (%) |
|----------------------|-------|------------|-------|------|-----------|------|------|-------------|-------|

#### **5.3 USCG**

In 2020, 7,383 PSC examinations were conducted by the USCG during the year, and 57 ships were detained due to serious deficiencies found onboard.

#### 5.3.1 USCG Statistics

Table 5.3.1 shows the number of safety related detentions for the three years from 2018 through 2020.

| Year | No. of<br>Safety Exams | No. of<br>Detentions | Annual<br>Detention<br>Ratio (%) | 3-Year Average<br>Detention<br>Ratio (%) |
|------|------------------------|----------------------|----------------------------------|--|
| 2018 | 9,025                  | 103                  | 1.14                             | 1.06                                     |
| 2019 | 8,622                  | 95                   | 1.10                             | 1.07                                     |
| 2020 | 7,383                  | 57                   | 0.77                             | 1.02                                     |

Table 5.3.1 Detentions by Year (Safety)

#### 5.3.2 Targeted Flag States (Safety)

The USCG targets Flag Administrations for additional PSC examinations if their detention ratio scores higher than the overall three-year rolling average detention ratio and if an Administration is associated with more than one detention in the past three years. The following flag states having a detention ratio higher than the overall average were listed as targeted flag states.

| Flag State                       | 2018-2020<br>Detention | Category    |  |
|----------------------------------|------------------------|-------------|--|
|                                  | Ratio (%)              | Category    |  |
| Barbados                         | 4.95                   |             |  |
| Belgium                          | 2.50                   |             |  |
| Bolivia*                         | 15.38                  |             |  |
| Cook Islands                     | 3.51                   |             |  |
| Israel                           | 15.38                  |             |  |
| Mexico                           | 5.57                   | High Risk   |  |
| St. Kitts and Nevis              | 20.00                  |             |  |
| Saint Vincent and the Grenadines | 5.03                   |             |  |
| Tanzania                         | 19.57                  |             |  |
| Тодо                             | 4.44                   |             |  |
| Turkey                           | 3.28                   |             |  |
| Antigua and Barbuda              | 1.70                   |             |  |
| Cyprus*                          | 1.60                   |             |  |
| Liberia                          | 1.11                   |             |  |
| Malta                            | 1.19                   | Medium Risk |  |
| Panama                           | 1.03                   |             |  |
| Philippines                      | 1.48                   |             |  |
| Portugal                         | 1.45                   |             |  |
| Vanuatu                          | 1.62                   |             |  |
