

Additional entries on Test Certificates

Amended Rule

Rules for the Survey and Construction of Steel Ships Part K

Reason for Amendment

In the case of steel castings and forgings, 1.1.1-2, Part K of the Rules for the Survey and Construction of Steel Ships is applied and the Society may issue test certificates using standards other than those given in the ClassNK Rules. In such cases, in order to confirm whether such standards have been satisfied, it is necessary for description of such standards to be included on submitted test certificates. Therefore, the relevant requirements have been amended to allow the description of such standards as well as any relevant mechanical test results to be added to test certificates.

Outline of Amendment

This amendment has specified that in cases where submitted test certificates use standards other than those of ClassNK, mechanical test results and descriptions of such standards are to be added to test certificates.
