

# **The Operating and Maintenance Manual for Doors and Inner Doors**

## **Amended Rules**

Rules for the Survey and Construction of Steel Ships Part C and CS

## **Reason for Amendment**

IACS Unified Requirements (UR) S8 and S9, related to the operating and maintenance manual for doors and inner doors, require that such manual is to be provided on board and is to contain necessary information on class and statutory certificates. However, since it is difficult to prepare the necessary copies of these certificates at the time of the submission of said manual for approval, and it not very logical to require that the renewal of such manual in conjunction with the periodical renewal of the aforementioned certificates, IACS URs S8 and S9 were revised so as to delete the words “class certificates” and “statutory certificates” from the list of necessary information required to be contained in said manual.

Accordingly, all relevant requirements of the Rules were amended so as to follow IACS URs S8(Rev.4) and S9(Rev.6).

## **Outline of Amendment**

Deleted the words “class certificates” and “statutory certificates” from the list of necessary information required to be contained in the operating and maintenance manual for doors and inner doors.
