

Liquid Cargo Tanks of Offshore Supply Vessels

Amended Rules

Rules for the Survey and Construction of Steel Ships Part O

Reason for Amendment

Requirements regarding offshore supply vessels are stipulated in Chapter 7 of the Rules for the Survey and Construction of Steel Ships, and these include requirements for liquid cargo tanks related to quantity limitations, tank segregation, etc.

The requirements for liquid cargo tanks are stipulated in reference to the IMO's "Guidelines for the Transport and Handling of Limited Amounts of Hazardous and Noxious Liquid Substances in Bulk on Offshore Support Vessels", and apply to offshore supply vessels carrying hazardous and noxious liquid cargoes. The application of certain parts of the ClassNK requirements, however, is unclear.

Therefore, relative requirements were amended in order to clarify their respective application.

Outline of Amendment

- (1) Clarified the application of requirements regarding liquid cargo tanks carrying hazardous and noxious liquid cargoes
- (2) Specified the condition of cargo fuels to which requirements regarding quantity limitations apply

Amended Requirements

Rules for the Survey and Construction of Steel Ships
Part O: 7.3.6-1
