

Figures Showing Examples of Locations Subject to Thickness Measurements During Special Surveys of Bulk Carriers

Amended Rules

Rules for the Survey and Construction of Steel Ships Part B

Reason for Amendment

IACS Unified Requirement (UR) Z10.2 specifies requirements related to the hull surveys of single side skin bulk carriers. In these requirements, the figure showing examples of locations subject to thickness measurements during Special Surveys, was unclear. IACS, therefore, modified this figure and adopted the revisions as UR Z10.2 (Rev.35, Corr.1) in September 2018.

Relevant requirements were therefore amended in accordance with IACS UR Z10.2(Rev.35, Corr.1).

In addition, figures showing examples of locations subject to thickness measurements during the Special Surveys of double side skin bulk carriers were amended.

Outline of Amendment

Amended figures showing examples of locations subject to thickness measurements during Special Surveys of bulk carriers.

Amended Requirements

Rules for the Survey and Construction of Steel Ships
Part B: Fig. B5.1, Fig. B5.2, Fig. B5.3, Fig. B5.4, Fig. B5.6
