

Amendment on 29 June 2026
Resolved by Technical Committee on 29 January 2026

Review of Expressions in Part X (Computer-based Systems) of the Rules for the Survey and Construction of Steel Ships

Object of Amendment

Rules for the Survey and Construction of Steel Ships Part X

Reason for Amendment

IACS Unified Requirement (UR) E22 (Rev.3), adopted in June 2023, stipulates requirements for computer-based systems used in ships, including the roles of relevant parties and the change management for software, and these requirements have been already incorporated into the NK Rules.

Subsequently, IACS conducted a review of this UR and adopted a corrected version of UR E22 (Rev.3, Corr.1) in September 2025.

In addition, Part X (Computer-based Systems) of the Rules was reviewed by the Society to further clarify and harmonise the expressions being used in it.

Accordingly, relevant requirements are amended based on UR E22 (Rev.3, Corr.1) and review of Part X.

Outline of Amendment

The main contents of this amendment are as follows:

- (1) Amends references to applicable ISO standard numbers, the explanations of figures and the descriptions concerning the timing of verification for the implementation of procedures related to change management of computer systems, as specified in Chapter 3, Part X of the Rules, in accordance with UR E22 (Rev.3, Corr.1).
- (2) Clarifies and harmonises the expressions used in Chapter 5, Part X of the Rules.

Effective Date and Application

Effective date of this amendment is 1 July 2026.

An asterisk (*) after the title of a requirement indicates that there is also relevant information in the corresponding Guidance.

ID:DD25-29
