

# **Brake Capacity of Mooring Winches**

## **Object of Amendment**

Rules for the Survey and Construction of Steel Ships Part C

## **Reason for Amendment**

Regulation II-1/3-8 of SOLAS requires ships be provided with towing and mooring equipment. In addition, the IMO has approved guidelines on the design and selection of mooring equipment (MSC.1/Circ.1619) and a uniform interpretation (UI) of regulation II-1/3-8 (MSC.1/Circ.1362(Rev.2)).

IACS subsequently adopted IACS Unified Interpretation (UI) 212 (Rev.1) to verify that the towing and mooring equipment meet the requirements of regulation II-1/3-8.

The Society has already incorporated the above requirements into its Rules. However, the requirements for the selection of mooring equipment were unclear.

Accordingly, relevant requirements are amended based on the relevant IMO circular and IACS UI.

## **Outline of Amendment**

Amends requirement for selection of mooring winch to clarify based on the relevant IMO circular and IACS UI.

## **Effective Date and Application**

The effective date of this amendments is 1 July 2026.

ID:DX25-12
