

標題

バハマ籍船における放射性物質の運送について

ClassNK

テクニカル インフォメーション

No. TEC-1013
発行日 2014年11月19日

各位

バハマ籍船における放射性物質(IMDG Code 上の Class 7 に分類される貨物)の運送に関しまして、今般、バハマ政府より、以下の通り通知がありましたのでお知らせ致します。

1. バハマ籍船において、放射性物質の積載は認められない。
ただし、医療用/公衆衛生用並びに非破壊試験で用いられるような民生用(適切な危険物等級と量)の放射性物質について、梱包した状態での積載については認められる(IMO Resolution A.984(24)を参照すること)。
2. 放射性物質のばら積みでの積載は認められない。

上記項目 2.に関しまして、IMSBC コードでは放射性物質として以下の 2 貨物の運送要件が規定されておりますが、これらの貨物を含んだバハマ籍船の IMSBC コード適合鑑定書につきましては、本テクニカルインフォメーション発行後の最初の定期的検査において、弊会検査員がこれらの貨物を削除しますので、ご注意ください。

[貨物]

- a) RADIOACTIVE MATERIAL, LOW SPECIFIC ACTIVITY (LSA-1) (IMO Class 7, UN NO.2912)
- b) RADIOACTIVE MATERIAL, SURFACE CONTAMINATED OBJECTS (SCO-1) (IMO Class 7, UN NO.2913)

INTERNATIONAL MARITIME ORGANIZATION

IMO

E

ASSEMBLY
24th session
Agenda item 13

A 24/Res.984
6 February 2006
Original: ENGLISH

Resolution A.984(24)

**Adopted on 1 December 2005
(Agenda item 13)**

**FACILITATION OF THE CARRIAGE OF IMDG CODE CLASS 7 RADIOACTIVE
MATERIALS INCLUDING THOSE IN PACKAGED FORM
USED IN MEDICAL OR PUBLIC HEALTH APPLICATIONS**

THE ASSEMBLY,

RECALLING Article 15(j) of the Convention on the International Maritime Organization concerning the functions of the Assembly in relation to regulations and guidelines concerning maritime safety and the prevention and control of marine pollution from ships,

HAVING CONSIDERED the general purpose of the Convention on Facilitation of International Maritime Traffic, 1965, as amended, in particular article III,

REAFFIRMING that chapter VII of the International Convention for the Safety of Life at Sea, 1974, as amended (1974 SOLAS Convention) and the International Maritime Dangerous Goods (IMDG) Code contain sufficient and adequate provisions for the safe carriage of dangerous goods in packaged form including IMDG Code class 7 radioactive materials,

BEING AWARE of difficulties encountered in the carriage of certain IMDG Code class 7 radioactive materials including those used for medical or public health applications,

BEING CONCERNED about the potential adverse consequences that denial of carriage of IMDG Code class 7 radioactive materials used in medical applications, for example Cobalt-60 and those radioisotopes used in radiotherapy and nuclear medicine, might have on public health,

NOTING the efforts of the Facilitation Committee, at its thirty-first and thirty-second sessions, to address and resolve the issue, and in particular the approval of FAL.6/Circ.12 on "Difficulties encountered in the shipment of the IMDG Code class 7 radioactive materials and, in particular, Cobalt-60",

NOTING ALSO the work done by the International Atomic Energy Agency (IAEA) in an effort to assist in the alleviation of the difficulties encountered in the carriage of IMDG Code class 7 radioactive materials,

For reasons of economy, this document is printed in a limited number. Delegates are kindly asked to bring their copies to meetings and not to request additional copies.

NOTING FURTHER the progress made by the IAEA in conjunction with the International Federation of Air Line Pilots' Associations on the problems related to refusals of air shipments of radioactive materials, in particular those used for medical applications, and the establishment, by the General Conference of the IAEA, through resolution GC(49)/RES/9, of a steering committee to oversee the resolution of the problem, as recommended by the IAEA Transport Safety Standards Committee,

ALSO NOTING that cessation of the transport of radioactive materials, except those used in medical or public health applications, through the regions of small island developing States is an ultimate desired goal of small island developing States and some other countries, and recognizing the right of freedom of navigation in accordance with international law,

RECOGNIZING the diverse and important uses of radioactive material, including Cobalt-60 and the need to ensure the effective and efficient carriage of this medical isotope for the benefit of public health,

1. INVITES Member Governments to note that carriage of IMDG Code class 7 radioactive materials, when carried out in compliance with the relevant provisions of chapter VII of the 1974 SOLAS Convention, the IMDG Code and the recommendations contained in MSC/Circ.675 on "Recommendations on the safe transport of dangerous cargoes and related activities in port areas", meets the necessary safety requirements and should be facilitated;
2. ALSO INVITES Member Governments to recognize the beneficial uses of IMDG Code class 7 radioactive materials in packaged form used in medical or public health applications and to facilitate their expeditious transportation;
3. FURTHER INVITES Member Governments to work with relevant national authorities and industry associations to raise the required level of awareness and to help alleviate the difficulties encountered in the carriage of IMDG Code class 7 radioactive materials including those in packaged form used in medical or public health applications;
4. URGES Member Governments and non-governmental organizations with consultative status to bring to the attention of the Facilitation Committee any instances, together with the associated reasons, where the carriage of IMDG Code class 7 radioactive materials, including those in packaged form used in medical or public health applications, encounter difficulties or are refused carriage aboard ship or in or through ports, so as to enable the Facilitation Committee to consider the matter further; to determine the actions required, and to report to the twenty-fifth regular session of the Assembly on the progress made towards resolving these issues;
5. REQUESTS the Facilitation Committee, in co-operation with other bodies of the Organization, to continue to work with a view to resolving difficulties encountered in the carriage of all IMDG Code class 7 radioactive materials, including those used in medical or public health applications, and to continue to co-operate with the IAEA in this respect;
6. AGREES that resolution of the difficulties encountered in the carriage of IMDG Code class 7 radioactive materials requires continued co-operation between the Organization and the IAEA and with any bodies the latter may set up to deal with the issue;
7. REQUESTS ALSO the Secretary-General to explore the possibility of establishing an *ad hoc* mechanism within the Organization to co-ordinate efforts to speedily resolve difficulties in the carriage of IMDG Code class 7 radioactive materials, in close co-operation with the IAEA.
