Chapter 17

Summary of minimum requirements

Mixtures of noxious liquid substances presenting pollution hazards only, and which are assessed or provisionally assessed under regulation 6.3 of MARPOL Annex II, may be carried under the requirements of the Code applicable to the appropriate position of the entry in this chapter for Noxious Liquid Substances, not otherwise specified (n.o.s.).

EXPLANATORY NOTES

Product name (column a)	The product name shall be used in the shipping document for any cargo offered for bulk shipments. Any additional name may be included in brackets after the product name. In some cases, the product names are not identical with the names given in previous issues of the Code.
UN Number (column b)	Deleted
Pollution Category (column c)	The letter X, Y, Z means the Pollution Category assigned to each product under MARPOL Annex II
Hazards (column d)	“S” means that the product is included in the Code because of its safety hazards; “P” means that the product is included in the Code because of its pollution hazards; and “S/P” means that the product is included in the Code because of both its safety and pollution hazards.
Ship type (column e)	1: ship type 1 (2.1.2.1) 2: ship type 2 (2.1.2.2) 3: ship type 3 (2.1.2.3)
Tank type (column f)	1: independent tank (4.1.1) 2: integral tank (4.1.2) G: gravity tank (4.1.3) P: pressure tank (4.1.4)
Tank vents (column g)	Cont.: controlled venting Open: open venting
Tank environmental control (column h)	Inert: inerting (9.1.2.1) Pad: liquid or gas padding (9.1.2.2) Dry: drying (9.1.2.3) Vent: natural or forced ventilation (9.1.2.4) No: no special requirements under this Code
Electrical equipment (column i)	Temperature classes (i') T1 to T6 - indicates no requirements blank no information Apparatus group (i'') IIA, IIB or IIC: - indicates no requirements blank no information Flash point (i''') Yes: flashpoint exceeding 60°C (10.1.6) No: flashpoint not exceeding 60°C (10.1.6) NF: nonflammable product (10.1.6)
Gauging (column j)	O: open gauging (13.1.1.1) R: restricted gauging (13.1.1.2) C: closed gauging (13.1.1.3)

Vapour detection (column k)	F: flammable vapours T: toxic vapours No: indicates no special requirements under this Code
Fire protection (column l)	A: alcohol-resistant foam or multi-purpose foam B: regular foam; encompasses all foams that are not of an alcohol-resistant type, including fluoro-protein and aqueous-film-forming foam (AFFF) C: water-spray D: dry chemical No: no special requirements under this Code
Materials of construction (column m)	Deleted
Emergency equipment (column n)	Yes: see 14.3.1 No: no special requirements under this Code
Specific and operational requirements (column o)	When specific reference is made to chapters 15 and/or 16, these requirements shall be additional to the requirements in any other column

- a If the product to be carried contains flammable solvents such that the flashpoint does not exceed 60°C, then special electrical systems and a flammable-vapour detector shall be provided.
- b Although water is suitable for extinguishing open-air fires involving chemicals to which this footnote applies, water shall not be allowed to contaminate closed tanks containing these chemicals because of the risk of hazardous gas generation.
- c Phosphorus, yellow or white is carried above its autoignition temperature and therefore flashpoint is not appropriate. Electrical equipment requirements may be similar to those for substances with a flashpoint above 60°C.
- d Requirements are based on those isomers having a flashpoint of 60°C, or less; some isomers have a flashpoint greater than 60°C, and therefore the requirements based on flammability would not apply to such isomers.
- e Applies to n-decyl alcohol only.
- f Dry chemical shall not be used as fire extinguishing media.
- g Confined spaces shall be tested for both formic acid vapours and carbon monoxide gas, a decomposition product.
- h Applies to p-xylene only.
- i For mixtures containing no other components with safety hazards and where the pollution category is Y or less
- j only certain alcohol-resistant foams are effective
- k Requirements for Ship Type identified in *column e* might be subject to regulation 4.1.3 of Annex II of MARPOL 73/78
- l Applicable when the melting point is equal to or greater than 0°C.

Chapter 18

List of products to which the Code does not apply

18.1 The following are products, which have been reviewed for their safety and pollution hazards and determined not to present hazards to such an extent as to warrant application of the Code.

18.2 Although the products listed in this chapter fall outside the scope of the Code, the attention of Administrations is drawn to the fact that some safety precautions may be needed for their safe transportation. Accordingly, Administrations shall prescribe appropriate safety requirements.

18.3 Some liquid substances are identified as falling into Pollution Category Z and, therefore, subject to certain requirements of Annex II of MARPOL 73/78.

18.4 Liquid mixtures which are assessed or provisionally assessed under regulation 6.3 of MARPOL Annex II as falling into Pollution Category Z or OS, and which do not present safety hazards, may be carried under the appropriate entry in this chapter for “Noxious or Non-Noxious Liquid Substances, not otherwise specified (n.o.s.)”.

EXPLANATORY NOTES

Product name	The product name shall be used in the shipping document for any cargo offered for bulk shipments. Any additional name may be included in brackets after the product name. In some cases, the product names are not identical with the names given in previous issues of the Code.
Pollution Category	The letter Z means the Pollution Category assigned to each product under Annex II of MARPOL 73/78. OS means the product was evaluated and found to fall outside Categories X, Y, or Z.

Chapter 18

Product name	Pollution Category
Acetone	Z

RESOLUTION MEPC.120(52)

adopted on 15 October 2004

GUIDELINES FOR THE TRANSPORT OF VEGETABLE OILS IN DEEPTANKS OR IN INDEPENDENT TANKS SPECIALLY DESIGNED FOR THE CARRIAGE OF SUCH VEGETABLE OILS IN GENERAL DRY CARGO SHIPS

THE MARINE ENVIRONMENT PROTECTION COMMITTEE,

RECALLING article 38(a) of the Convention on the International Maritime Organization concerning the function of the Committee conferred upon it by international conventions for the prevention and control of marine pollution,

RECALLING ALSO resolution MEPC.118(52) by which it adopted the revised Annex II of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto (hereinafter referred to as "MARPOL 73/78"),

RECALLING FURTHER resolution MEPC.119(52) by which it adopted amendments to the International Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (IBC Code),

CONSIDERING that the Maritime Safety Committee, at its seventy-second session, considered and approved the proposed amendments to the IBC Code with a view to adoption under the provisions of the International Convention for the Safety of Life at Sea, 1974 (1974 SOLAS Convention).

RECOGNIZING the current practices for the transport of vegetable oils in deeptanks in general dry cargo ships,

RECOGNIZING ALSO the current practices of the transport of vegetable oils in independent tanks specially designed to carry these vegetable oils on board of general dry cargo ships,

NOTING the need for the continuation of the current mode of transport of these vegetable oils on specifically identified trades, where the lack of availability of NLS tankers is demonstrated,

BEING CONVINCED that adequate precaution is needed to provide the protection of the marine environment at the level as required by Annex II of MARPOL 73/78, as amended,

1. ADOPTS the Guidelines for the transport of vegetable oils in deeptanks or in independent tanks specially designed for the carriage of such vegetable oils in general dry cargo ships, the text of which is set out in the Annex to this resolution; and
2. INVITES the Parties to note that the guidelines shall take effect on 1 January 2007.

GUIDELINES FOR THE TRANSPORT OF VEGETABLE OILS IN DEEPTANKS OR IN INDEPENDENT TANKS SPECIALLY DESIGNED FOR THE CARRIAGE OF SUCH VEGETABLE OILS IN GENERAL DRY CARGO SHIPS

1 Preamble

1.1 The Guidelines have been developed to allow general dry cargo ships, which are currently certified to carry vegetable oil in bulk, to continue to carry these vegetable oils on specific trades. These guidelines only apply under the following conditions:

- .1 the vegetable oils are carried in deeptanks or independent tanks in general dry cargo ships specifically designed for the carriage of such oils under an NLS Certificate issued before 1 January 2007;
- .2 the products allowed to be carried are restricted to those unmodified vegetable oils (primarily triglycerides) which are listed in the IBC Code with a pollution hazard only; and
- .3 the ship complies with all discharge requirements under Annex II to MARPOL 73/78.

1.2 The Guidelines have been developed in accordance with the provisions set forth in regulation 11.2 of Annex II to MARPOL 73/78 and in recognition of the need for standards, which provide an alternative to the International Code for the Construction and Equipment of Ship Carrying Dangerous Chemicals in Bulk.

2 Carriage in deeptanks

2.1 An Administration may grant a relaxation for the carriage requirements, as required by the IBC Code, when vegetable oils are carried in deeptanks in general dry cargo ships between States for which it is demonstrated that, as a result of their geographical location, the transport of vegetable oils from the exporting State to the receiving State would not be viable using NLS tankers as required by Annex II to MARPOL 73/78. This relaxation shall be endorsed on the ship's Certificate. Such relaxation shall be communicated to the IMO by the Administration.

2.2 Every general dry cargo ship, falling under paragraph 2 of the guidelines, shall be subject to Annex II to MARPOL 73/78 regarding the discharge requirements and the carriage of a Manual and shall be certified to carry vegetable oils by means of the issue of a certificate under regulation 10.1 of that Annex.

2.3 Before granting a relaxation, the Administration shall receive a confirmation in writing that both the Government of the country of loading and the Government of the country of unloading concur with the proposed relaxation. These confirmations shall be retained on board.

3 Carriage in independent tanks

3.1 An Administration may grant a relaxation for the carriage requirements as required by the IBC Code when vegetable oils are carried in independent tanks in general dry cargo ships specially designed for the carriage of these vegetable oils. This relaxation shall be endorsed on the ship's Certificate. Such relaxation shall be communicated to the IMO by the Administration.

3.2 The following criteria on construction and trade for such relaxation shall apply:

- .1 the independent tanks shall be situated at least 760 mm from the shell plating; and
- .2 such carriage of vegetable oils shall be restricted to specifically identified trades.

3.3 Every general dry cargo ship falling under paragraph 3 of the guidelines shall be subject to Annex II to MARPOL 73/78 regarding the discharge requirements and the carriage of a Manual and shall be certified to carry vegetable oils by means of the issue of a certificate under regulation 10.1 of that Annex.

3.4 Before granting a relaxation the Administration shall receive a confirmation in writing that both the Government of the country of loading and the Government of the country of unloading concur with the proposed relaxation. These confirmations shall be retained on board.

ケミカル適合証書又は NLS 証書発給申込 及び オペレーションマニュアル並びに P&A マニュアル承認申込書
